Official Announcement

Strategic Transition and Brand Protection in China

Holcim Solutions and Products EMEA BV is announcing important updates regarding our business operations and brand integrity within the Chinese market.

- **Business Model Adjustment**

As part of a strategic realignment of our business model in the China region, Holcim ELEVATE (Shanghai) Building Products Co., Ltd. has stopped its direct sales to the market operations. All sales activities until further notice have been fully transitioned to our authorized reseller:

- **Authorized Partner: <<click here>>**

- **Brand Integrity & Anti-Counterfeiting Alert**

We have recently identified unauthorized products—including TPO membranes, insulation boards, and vapor barriers—falsely bearing the ELEVATE brand name (previously known as Firestone) in the Chinese market.

These counterfeit goods are produced without our authorization and pose a significant risk to project quality and market reputation. Holcim remains committed to protecting our intellectual property and the interests of our customers.

Notice: We will pursue all available legal remedies against any entity or individual involved in the production, distribution, or sale of counterfeit HOLCIM / ELEVATE products.

- **Report Unauthorized Activity**

We value the support of our industry partners in maintaining a fair and authentic marketplace. If you encounter suspicious products or unauthorized sellers, please report them through our official channels:

Complaint Email: info-emea-hbe@holcim.com

We appreciate your continued trust in our brand and your cooperation in upholding our global standards of quality.
